```

- 1 going on in the industry.
- 2 Q. So when is the first time you researched Crawl
- 3 Space Door Systems in this regard?
- 4 A. I would say right around the time that they
- 5 first started advertising that they now had an
- 6 engineered vent. Engineered is a word, up until they
- 7 came out with that photocopy certification, which was
- 8 reserved for something that mechanically operated to
- 9 reveal an unobstructed opening, which was required to
- 10 be ICC certified to be compliant.
- 11 So it was probably a search tied to engineered.
- 12 I would say it was right around the time of 2009 when
- 13 they first released their certification that their vent
- 14 was good for 200 square feet of coverage, and had I
- 15 think they said 95 square inches of net open area and
- 16 128 square inches if it was used as a nonengineered
- 17 opening. All of those calculations are incredibly
- 18 wrong, and so when I saw 200, that immediately struck
- 19 me as, you know, what the heck is going on. Our vent
- 20 covers 200 square foot, has since day one, based off of
- 21 performance testing.
- 22 And prior to that, I was able to see that they
- 23 were selling that same now engineered vent as an air
- 24 vent, no different, on their website, clear as day. So
- 25 they had the same product as an engineered vent, and

- 1 Q. Are the Flood Flaps and the Flood Solutions
- 2 products, are they engineered or nonengineered?
- 3 A. Flood Flaps is a engineered, mechanically
- 4 operated flood vent. Flood Solutions had their
- 5 calculations certified that they were correct. They
- 6 never went through performance testing. Their
- 7 calculations are associated with nonengineered
- 8 openings, .20 is the coefficient of discharge that's
- 9 used to -- you know, that they used in their
- 10 calculations that got certified by the ICC, which is
- 11 referenced in ASCE 24 '98, '05 and '14. .20 is the
- 12 coefficient of discharge associated with nonengineered
- openings per ASCE 24-05.
- 14 Q. What is the coverage of Flood Solutions
- 15 product?
- 16 A. I don't know.
- 17 Q. Do you know the coverage of Flood Flaps?
- 18 A. Not off the top of my head.
- 19 Q. So do you believe the Flood Solutions' model
- that's been certified by ICC-ES and the Flood Flaps'
- 21 model that's been certified by ICC-ES comply with the
- TB1 and can be sold legally?
- 23 A. Yes.
- 24 Q. Yes. Other than those two, are there any other
- 25 flood vents that, in your opinion, can be sold legally?

- 1 defines as the nonengineered opening to meet the flood
- 2 venting regulations, one square inch of net open area
- 3 for every one square foot.
- 4 BY MR. ONUFRAK:
- 5 Q. But you believe your vent is an engineered
- 6 opening, correct?
- 7 A. Our vent is an engineered opening.
- 8 Q. Because you have the ICC-ES report, right?
- 9 A. Because we have an ICC evaluation report and
- 10 FEMA recognizes an ICC evaluation report. That's what
- 11 they want for mass produced flood vents, so, yes.
- 12 Q. So your vents are sold properly to the public,
- 13 including this designer, like Ms. Riegle for 200 square
- 14 feet of coverage, which is more than your here -- the
- 15 one to one ratio here, correct?
- 16 A. Yes.
- 17 Q. And you've earned that because you have the
- 18 ICC-ES certification, right?
- 19 A. We haven't -- we've proven that our vent can
- 20 cover 200 square foot, and the ICC evaluation report
- 21 has checks and balances. They review the technical
- 22 reports. They review performance testing, so, yeah, we
- 23 can sell our vent at 200 square foot, and it's
- 24 recognized by FEMA.
- 25 Q. Now, despite that, isn't it often the case that
